Medical Assistant (MA)

Medical assisting is one of the nation's fastest growing careers, according to the United States Bureau of Labor Statistics this profession has an 18% projected growth in the US. Certified Medical Assistants (CMAs) have a great amount of variety in their jobs and are cross trained to perform many administrative and clinical duties.

Program Goals and Minimum Expectations:

- To promote the medical assisting program to meet the employment needs of the community.
- To provide a learning experience to assist graduates in performing administrative clinical skills in an allied health setting.
- To provide a high-quality education to ensure that graduates demonstrate basic level competencies.
- To prepare students to successfully complete the CMA examination.
- "To prepare medical assistants who are competent in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession." As outlined for accredited programs by the Medical Assisting Education Review Board.
